

In a day and age where 'free' always costs, 'upgrades' run you the same price as the product you just purchased, and the oil companies are making you scrape your couch cushions for that extra cent to get you to work, we slide up between the cracks and give something back to the public.

Saga Power Canada Inc. is the leading offshore importing company in Canada. Established in the West with 4 years of experience and over forty dealers, we are now also extending our venture to the East and bringing more of our products and savings to you.

Equipped with four models of scooters and a fifth on the way in early spring we have stormed the market with a scooter for everyone! Models range from 50cc-250cc. We have also equipped ourselves with a Transport Canada-cleared 250cc street legal Enduro.

All of our Scooters come with a free luggage box and windshield. Estimated cost savings of \$300, and are backed by a 2 year limited parts and labour warranty. All parts are stocked in house. Need accessories? No problem. Helmets and bike locks are just one more thing we bring to our customers.
